

### **7.3 INSTITUTIONAL DISTINCTIVENESS**

**2015-16**

The quality and value based education is the need of the hour. The college emphasizes on this aspect and tries to impart knowledge to students not only in their relevant subjects but also in all other areas of day to day life. The teachers are encouraged to adopt and adapt to modern methods of teaching and learning. The vision of the institute also demands teaching fraternity to give moral knowledge to the student community for their holistic development. The institute gives priority to various educational as well as awareness programmes for the student community so that they gain knowledge and become self reliant and confident to achieve the desired result. For the benefit of the student remedial classes are also undertaken where weaker students are encouraged and given extra hours to come at par with other students. This helps in narrowing the knowledge gap between the good and the weaker students.
